

Introduction: PDI's lightweight *carbon fiber* FLEXCON™ is a modular alternative to labor-intensive laminations for patients with flexion contractures. The FLEXCON™ flexes slightly under weight-bearing forces, enhancing gait during toe-off. Simply attach FLEXCON™ between PDI's pyramid and PDI's Modular Lock. The FLEXCON™ compensates for the flexion contracture angle and creates an offset based on the length of the residual limb and the angle of the flexion contracture. **US Patent # 6,991,658**

Choose the correct FLEXCON™ for your application:

FC15-TD10CFI

Suggested L-Code:
L5845

Offset	PDI Part Number
2.07"	FC15-TD8CFI
2.59"	FC15-TD10CFI
3.11"	FC15-TD12CFI

SPECIFICATIONS For FC15-TD8CF

Thickness: 9.5 mm (3/8")
 Weight: 98 g (3.5 oz)
 Load Rating:
 High Activity 220 lbs (100 Kg)
 Moderate Activity 265 lbs (120 Kg)

SPECIFICATIONS For FC15-TD10CF

Thickness: 9.5 mm (3/8")
 Weight: 98 g (3.5 oz)
 Load Rating:
 High Activity 220 lbs (100 Kg)
 Moderate Activity 265 lbs (120 Kg)

SPECIFICATIONS For FC15-TD12CF

Thickness: 9.5 mm (3/8")
 Weight: 98 g (3.5 oz)
 Load Rating:
 High Activity 220 lbs (100 Kg)
 Moderate Activity 265 lbs (120 Kg)
